Economic Development

EMERGENCY RELIEF REPORT 2017

**COMPILED
BY
HELPING HAND FOUNDATION
FOR
Support for Educational and
Economic Development (SEED)**

WAY FORWARD

SEED (Support for Educational and Economic Development) is providing grants to a Hyderabad based Charity, M/s Helping Hand Foundation, which works in the area of medical and health for the past four years. The Grants provided by SEED are providing a huge succor to the down trodden and disadvantaged sections of the Hyderabad community, more particularly a cross section of poor from the old city areas of Hyderabad. Needless to say, Hyderabad city and Urban slums, which have a significant minority population is seeing an uprising of Communicable and Non communicable diseases. TB, HIV, Hepatitis B & C are seeing a huge increase in the communicable disease front and diabetes, Cardiovascular diseases, Cancer, Chronic Kidney disease etc are seeing a rise in the NCD front. With Government health infrastructure lacking proper facilities and shortage of doctors the only recourse for such patients is to seek help from other private charitable hospitals.

Minority based hospitals in Hyderabad namely Princess Esra, Deccan Medical College/OHRC and Princess Durru Shehvar Hospitals provide subsidized treatment for minority patients – HHF has entered into strategic partnerships with all the above said hospitals and the Grants from SEED are actually helping us run an Insurance kind of scheme for the poor patients in these hospitals, in other words the patient referred by us walks in and walks out and we are footing the bill through the funds coming from SEED at the end of every month.

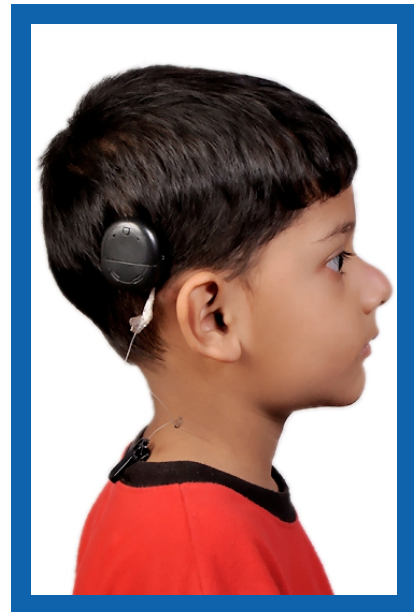

In the year 2017, we have provided medial relief to at least 350 patients through this arrangement and we thank SEED and the Board of SEED along with the donors of SEED for this wonderful and noble gesture.

MUJTABA HASAN ASKARI
MANAGING TRUSTEE
HELPING HAND FOUNDATION

Master. Syed Moinuddin
Age, 10yrs.....
